Response

14 It should be more exercises included in the presentation or it should gave a separate session for exercises

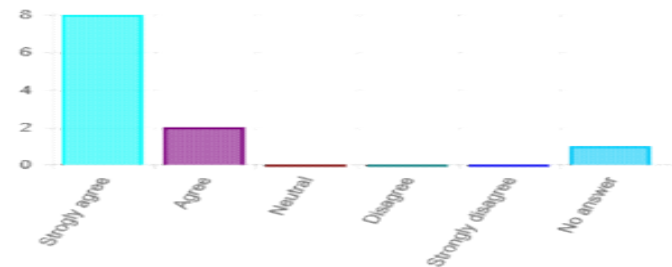

15 Next time a short introduction to the statistics used and the notation would be helpfull. I was lost pretty quickly so maybe it was

- 16 It was a strange hybrid between a lecture and an exercise class. I would prefer to split it more strongly. Make one lecture part
- 18 Some codes were very specific and additional package installation was needed, and some of those packages were not public!
- 21 The exercises consisted basically of running the lecturers code
