**Letter of support for  
FIN-TECH: A FINancial TECHnology training platform**

Dear Sirs/Madams,

We have been approached by researchers from The University of Tampere, led by Prof. Lasse Koskinen, who are submitting, together with 24 other European research center and fintech partners, a project proposal on 'FIN-TECH: A FINancial TECHnology training platform' in response to the Coordinated and Support Action Call Horizon 2020 ICT-35-2018 from your organisation.

We understand that the research team is proposing to develop a state-of-the-art innovative and research based education program in the areas of Artificial Intelligence, Blockchain, Cryptocurrencies, Cybersecurity, Financial Data Science, Marketplace lending, RegTech and/or Robot Advisory, that our staff and staff from FinTech companies invited by us could take free of charge. This education program will be developed on demand and delivered on-site by the respective network of partners, funded by the Call.

We highly endorse such knowledge transfer, from established academic centers of excellence to start up FinTech companies and public service bodies and can confirm that the insurance division of the Swedish Financial Supervisory Authority is interested in participating and benefiting from the proposed educational program.

Sincerely,

Åsa Larson  
*Executive Director*
